This cryptic might be difficult to navigate, but it contains all the directions you’ll need. Once you’ve filled in the grid, your goal will be to get from the upper left square of the grid to the lower right square, moving one square at a time horizontally or vertically but not diagonally, and ignoring all bars. To do so, you’ll need to follow the compass directions. Whenever you hit an N, S, E, or W, you must go in that direction, turning from your current direction if necessary, continuing along that path until you hit another directional marker. Whenever you hit a square that contains two of these letters, you must choose one of those two directions to follow. If you choose incorrectly, your path will eventually hit an X, signifying a dead end, and you need to backtrack and try again. Enumerations are withheld, and 9-Down is somewhat unfamiliar. Happy orienteering!
